

The following document contains images of Doorstop thresholds, in various positions with annotations.

For measurements and dimensions, please refer to the threshold guide at the end of the document.

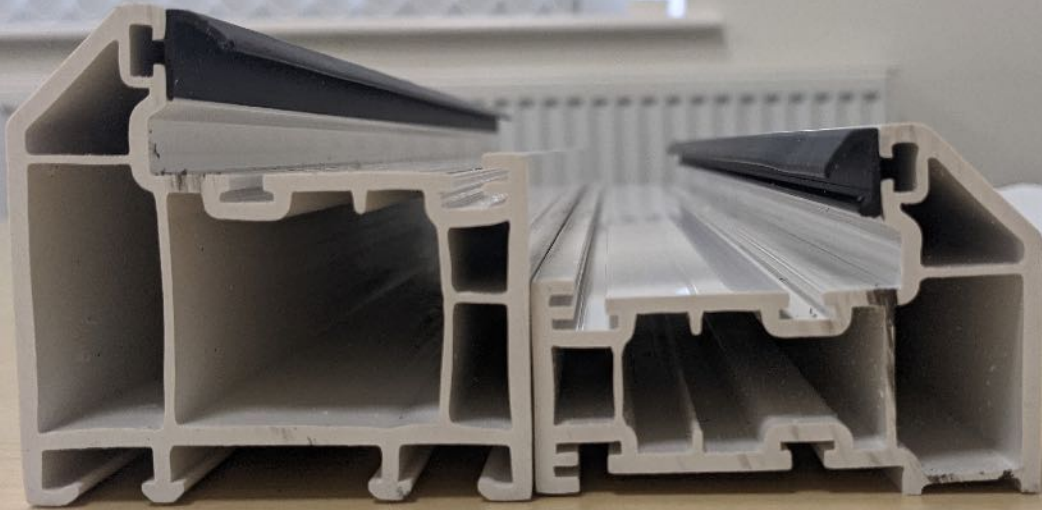

This is the FULL PVC threshold, the highest option of threshold available.

Another image of the full pvc threshold at a different angle.

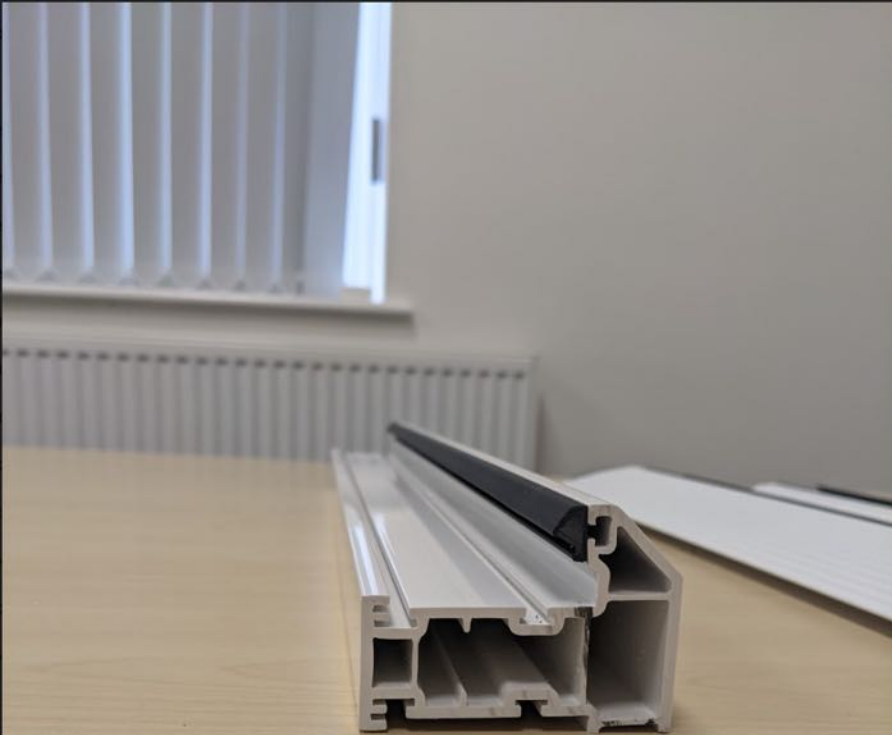

FULL PVC Threshold

Full PVC threshold VS a Low PVC Threshold

Notice the height difference in the centre.

An image of the LOW PVC threshold on its own.

Another image of the LOW PVC threshold

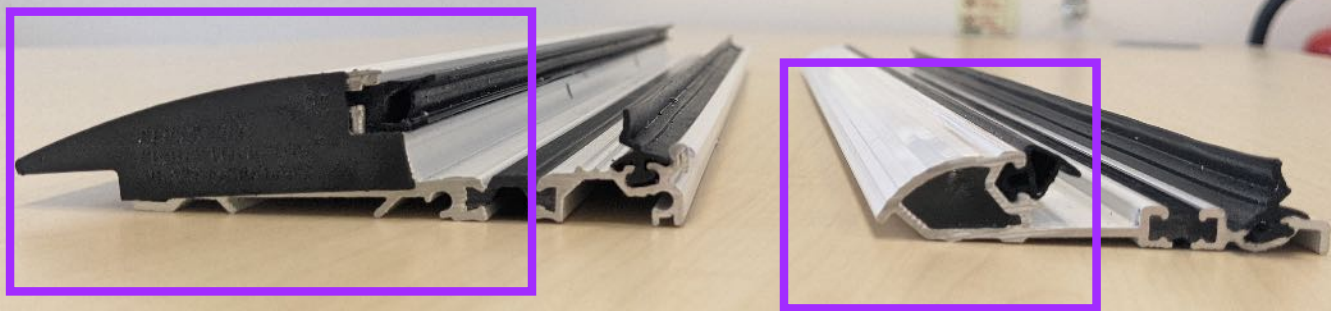

This is a Wheelchair threshold, notice the small short ramp

This is a close up of the wheelchair threshold cross-section.

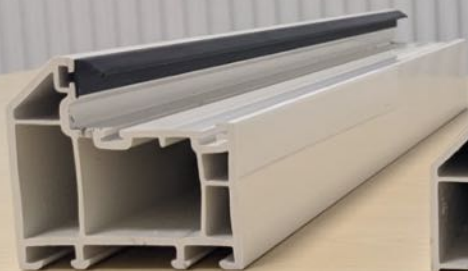

This is the Wheelchair MDS25 threshold, only intended for mobility purposes

This is a MDS25 wheelchair vs the standard wheelchair threshold, notice the difference in the ramps.

This is the MDS25 wheelchair threshold again notice the depth of the ramp, and the height of the ramp.
